VSC®900

The uncompromising solution to the exisiting and future demands of document examination

A compact, benchtop and highly capable Questioned Document Evidence (QDE) imaging system, the new VSC®900 provides examiners with a comprehensive suite of tools for the interrogation and verification of evidence types such as passports and ID cards, whilst also broadening the remit to larger format evidence given the new A4/US Letter field of view.

With unrivalled image quality, the VSC®900 is capable of 130x magnification and a 20x zoom, with LED illumination across all wavelengths.

Compact and uncompromising,
the VSC®900 is a forensic-level solution
for the examination and authentication
of all questioned documents

For the examination of Questioned Documents.

--------------Applications--------------

- **Forensic Laboratory**
- **Border Security & Immigration**
- **National Banks**
- **Security Printers**
- **High-Security Locations**
- **Card Grading & Authentication**

For the forensic-level examination of documents including:

Passports	Visas	Banknotes
Breeder Documemts	Certficates & Permits	
Artwork	Lottery Tickets	Collectibles
Identity Cards	and many more...	

----------------Hardware----------------

- **High-Resolution 8MP camera**
- **Large (A4) document viewing area**
- **130x magnification**
- **Full LED illumination**
- **Motorised XY postioning stage**
- **Choice of embedded or external PC**

----------------Features----------------

- **A complete, QDE workstation**

- **For the forensic-level examination of all questioned documents**

- **Authenticate genunie documents**

- **Detect counterfeits and frauds**

VSC: Precision Imaging Technology

foster+freeman

Industry-leading technology for the professional examination, interrogation and authentication of questioned documents

Detect Fakes & Counterfeits

Reveal Hidden Details

Inspect Security Features

The first in a new generation of document imaging systems

High Resolution Document Imaging
Excellent clarity and image resolution of documents captured using a high-precision 8MP camera

Multispectral UV-Vis-IR Illumination
Full LED directional, multi-spectral light sources can reveal hidden details and semi-covert security features designed to respond at set wavebands.

Large A4/US Letter Size Examination Area
Examine large format documents using the system's enhanced field of view to capture images of documents in their entirety.

Reveal, Examine & Decode Security Features
Interrogate visible and embedded security features including eChip data, holograms and encoded images.

Forensic-Level Examination
The final word in document authentication.
