LIGHT SOURCE ACCESSORY GUIDE

*"I have personally had a great professional experience with foster+freeman for the last decade. My Police Department has purchased two Crime-lite X10s and one Crime-lite AUTO. We are in the process of procuring two additional Crime-lite AUTOS"*  
 Forensic Examiner, City and County Police Dept.

*"Light intensity, construction, versatility, convenience, and overall quality are outstanding. New light sources have been developed by forensic professionals for forensic professionals"*  
 University Program Director, Crime Scene Investigation

*"This piece of equipment did more to improve this office's ALS capabilities than any other ALS equipment previously utilized by this office's personnel"*  
 Forensic Examiner, US Military

*“Forensic imaging technology meets powerful multi-spectral illumination, in this complete solution to the search, detection, and capture of evidence”*

# Crime-lite<sup>®</sup> AUTO

SEARCH  
DETECT  
CAPTURE

**Best-in-Class Technology**

**A Complete Evidence Search Tool**

**Expert Technology, Simply Operated**

The all-in-one forensic search, detection and imaging device, Crime-lite AUTO is the must-have technology for the forensic and crime scene professionals worldwide.

## Why Crime-lite AUTO?

### All-in-One Solution

3 essential technologies in a single handheld device:

- ▶ High-intensity Illumination
- ▶ UV-Vis-IR Camera
- ▶ Intelligent Filtration

### Streamlined Examinations

Perform a fast and effective search for evidence:

- ▶ Evidence Detection
- ▶ Auto-Focus Photography
- ▶ Remote Image Transfer

### Full-Spectral Imaging

for the detection of 'invisible' items of evidence:

- ▶ Infrared Imaging
- ▶ Fluorescence Examination
- ▶ Intelligent Filtration

### Coaxial Illumination Box QCL/AUTO/ACC/10

Clip-on accessory for imaging evidence on mirrored and highly reflective surfaces.

- ▶ Clip-on accessory for Crime-lite AUTO
- ▶ for single-plane illumination/imaging
- ▶ 5700K diffuse white coaxial light
- ▶ 'On/Off-axis' control (0-9°)
- ▶ Illumination intensity control
- ▶ Focus adjustment

### Oblique Ring Light QCL/AUTO/ACC/9

Clip-on accessory improves ridge detail when capturing 3D fingerprints.

- ▶ Clip-on accessory for Crime-lite AUTO
- ▶ for multi-angle surface illumination/imaging
- ▶ 12x White 5700K LEDs
- ▶ 12x UV 365nm LEDs
- ▶ Illumination intensity control
- ▶ Illumination direction control

# PRO Crime-lite AUTO Accessories

## Scene of Crime Tripod

QCL/14

Mount the Crime-lite AUTO on a tripod to eliminate camera shake.

- ▶ PRO-grade photography tripod
- ▶ Closed height 25.6"
- ▶ Extended height 63.8"
- ▶ Standard 1/4 whitworth thread mount

A Crime-lite AUTO and X are mounted on a tripod

QCL/14

## Laboratory Arm

QCL/AUTO/ACC/11

For easy laboratory operation and scanning of evidence.

- ▶ Heavy duty, low profile articulated arm
- ▶ Bench or wall mount
- ▶ Internal Crime-lite AUTO power cable
- ▶ Quick-release clamp

Mounted on a Laboratory Arm, connected to external monitor

QCL/AUTO/ACC/11

*“An ALS range that ensures the highest quality of results, increasing evidence yields and providing superior visibility for the examination and photography of evidence.”*

# Crime-lite® 82SPRO

**Tried & Trusted Technology**

**Superior Detection of Evidence**

**Power, Intensity, and Performance**

Used and trusted by law enforcement, military, & clinical forensic examiners worldwide, Crime-lite 82S light sources can be relied upon to provide the high-intensity narrow bandwidth illumination required to detect even the smallest traces of forensic evidence.

## Why Crime-lite 82S PRO?

### The World's #1 LED ALS

Providing unrivalled beam intensity and performance:

- ▶ 16x LEDs per Wavelength
- ▶ High-Intensity Beam
- ▶ Always 100% Output

### Durable, Reliable Performance

Proven technology tried and trusted by experts worldwide:

- ▶ Unrivalled Build Quality
- ▶ Best-in-Class Components
- ▶ Rigorously Tested

### Detect More Evidence

Search the forensic spectrum to detect more evidence.

- ▶ Fingerprints
- ▶ Body Fluids
- ▶ Physical Evidence

RED	82S PRO White	QCL/82/007

### Dark Adaptation Kit

Simple pocket-sized device that helps examiners to achieve optimum dark adaptation when entering a dark environment to search for evidence using a forensic light source.

Dark Adaptation Checker QCL/264

Dark Adaptation Goggles QCL/266

## **PRO VISION** UV-Vis-IR Imaging Accessories

Search beyond the visible spectrum using a UV to IR sensitive camera attachment with integral filter wheel.

**Crime-lite UV-VIS-IR Camera**  
5MP USB2.0 CMOS auto-focus camera

**QCL/82S/CAM**

- ▶ 12mm f/2.8 lens
- ▶ Adjustable angle slide-on
- ▶ Wireless remote control
- ▶ Indexed filter wheel (4 positions)

Compatible with all handheld Crime-lite light sources and the Crime-lite ML2 laboratory light source.

*“An ALS range that ensures the highest quality of results, increasing evidence yields and providing superior visibility for the examination and photography of evidence.”*

# Crime-lite® 82LPRO

**Surface Examinations**

**White and UV Illumination**

**Power, Intensity, and Performance**

A unique light source providing a 'sheet' of low angle surface illumination that is ideal for detecting evidence including scratches, scrapes and other surface impressions, tool marks, 3D fingerprints (e.g. fingerprints in putty), and shoe prints in dust.

## Why Crime-lite 82L PRO?

### A Unique Linear ALS

Providing high intensity White or UV illumination:

- ▶ 16x LEDs per Wavelength
- ▶ High-Intensity Beam
- ▶ Dimmable Intensity

### Durable, Reliable Performance

Proven technology tried and trusted by experts worldwide:

- ▶ Unrivalled Build Quality
- ▶ Best-in-Class Components
- ▶ Rigorously Tested

### Detect Surface Evidence

Scan surfaces to reveal evidence and create contrast:

- ▶ Shoeprints
- ▶ Toolmarks
- ▶ Surface Debris

*“Intense, ultra-narrowband LASER illumination for the detection and examination of every last trace of forensic evidence”*

# Crime-lite<sup>®</sup> LASER

BLUE 447

GREEN 520

**Forensic LASER Technology**

**Output Power x Portability**

**Surgically Precise Illumination**

Available in Blue (447nm) & Green (520nm) wavelengths, the Crime-lite LASER provides surgically precise illumination designed to excite fluorescence within a narrow 2nm bandwidth, illuminating only the desired target evidence without exciting any unwanted background fluorescence.

High-intensity LASER output  
Blue 447nm | Green 520nm

Intense shadow-free illumination  
Powerful divergent beam

Triple-Locked Safety  
Class 3B LASER technology  
User-first design

Advanced Functionality  
Including self-test & dark adaption

## Why Crime-lite LASER?

### Precise LASER Illumination

Tightly focussed beam for increased light intensity:

- ▶ Illuminate Target Evidence
- ▶ Pinpoint LASER Accuracy
- ▶ Increase Evidence Contrast

### Complete End-User Safety

Triple-interlocked safety features include:

- ▶ Passcode activation
- ▶ Dead Man's Trigger
- ▶ Mechanical Beam Shutter

### Detect Every Last Trace

Reduce unwanted fluorescence to reveal evidence including:

- ▶ Latent Fingermarks
- ▶ Minute Traces of DNA
- ▶ Narcotics, GSR and More

*“Handheld, Multi-Spectral LED Light Source with Advanced Functionality:  
The biggest leap forward in Forensic Light Source technology for over 20 years.”*

# Crime-lite® X

**Multispectral LED Light Sources**

X<sub>10</sub>

X<sub>5</sub>

A complete ALS kit in a single light source, the Crime-lite X enables the examiner to seamlessly switch between White, UV, Violet, Blue, Blue/Green, Green, Orange, Red, and Infrared LEDs, to perform a comprehensive multi-spectral examination of a crime scene.

## Why Crime-lite X?

### The Complete ALS Device

A complete ALS kit in a single light source:

- ▶ Multi-LED Light Sources
- ▶ Switch between Wavelengths
- ▶ Up to 175x Combinations

### Built-in Functionality

Control device functions via the integral LED interface:

- ▶ Cycle Wavebands
- ▶ Self-Test Diagnostics
- ▶ Dark Adaptation Checker

### For Every Evidence Type

Reveal more evidence using multispectral illumination:

- ▶ X5 Serology ALS
- ▶ X10 for Fingerprints
- ▶ X10 for General Search

### Power Accessories Order Code

**Rechargeable Battery** **QCL/X/ACC/1**

“The first high intensity dual-colour forensic Crime-lite for CSI and lab applications.”

# Crime-lite® 42S

## Dual-Waveband LED Light Sources

Switchable between two arrays of 8 high-intensity LEDs, the Crime-lite 42S provides the examiner with three illumination outputs in a single alternate light source.

Blue/White  
*First Responder*

Blue/Green  
*Fluorescence*

Blue/Blue Green  
*Fluorescence*

Blue/Green  
*for fpNatural*

UV/Violet  
*Skin and DNA*

Green/Orange  
*Fingermarks*

UV/Infrared  
*Beyond Visible*

## Why Crime-lite 42S?

### The 2-in-1 ALS Solution

Providing 2 LED wavelengths in every light source:

- ▶ Multiple LED Combinations
- ▶ Switch Between Outputs
- ▶ 8x LEDs per Wavelength

### Versatility x Usability

Maximise the search for evidence:

- ▶ Simple 3-way LED Control
- ▶ Twin-Filter Viewing Goggles
- ▶ Adjustable Output Intensity

### Evidence-Based LED Pairings

Dual-wavelength light sources in practical combinations:

- ▶ White/Blue CSI Search
- ▶ UV/IR Beyond Visible Search
- ▶ UV/V Body Fluid Search

# Crime-lite<sup>®</sup> 2

## 2nd Generation LED Light Sources

The Crime-lite 2 range of single-LED light sources has been designed to maximise the clarity of forensic evidence and is highly effective at short range for the location and examination of evidence.

Providing even, shadow-free illumination, the range includes a white light model for general search and eight narrow band light sources with wavelengths in UV, violet, blue, blue-green, green, orange, red, and infrared for beyond visible examinations.

## Why Crime-lite 2?

### Tried & Trusted Technology

Used by forensic examiners worldwide:

- ▶ Thousands of Units in Use
- ▶ Used in Numerous Cases
- ▶ Trusted by Experts

### Simple & Highly Effective

2nd generation Crime-lite technology:

- ▶ Integrated Light and Battery
- ▶ One-Button Operation
- ▶ 50'000 Hour LED Lifetime

### 100% Crime-lite Quality

High quality components, built to perform:

- ▶ Intense shadow-free beam
- ▶ Always 100% light output
- ▶ Solid, Robust Construction
